An aerial photograph showing the edge of a wooden deck on the right, meeting the turquoise ocean. White, frothy waves are crashing against the deck, creating a stark contrast between the natural wood and the powerful water. The water transitions from a deep teal to a lighter, bubbly white as it breaks.

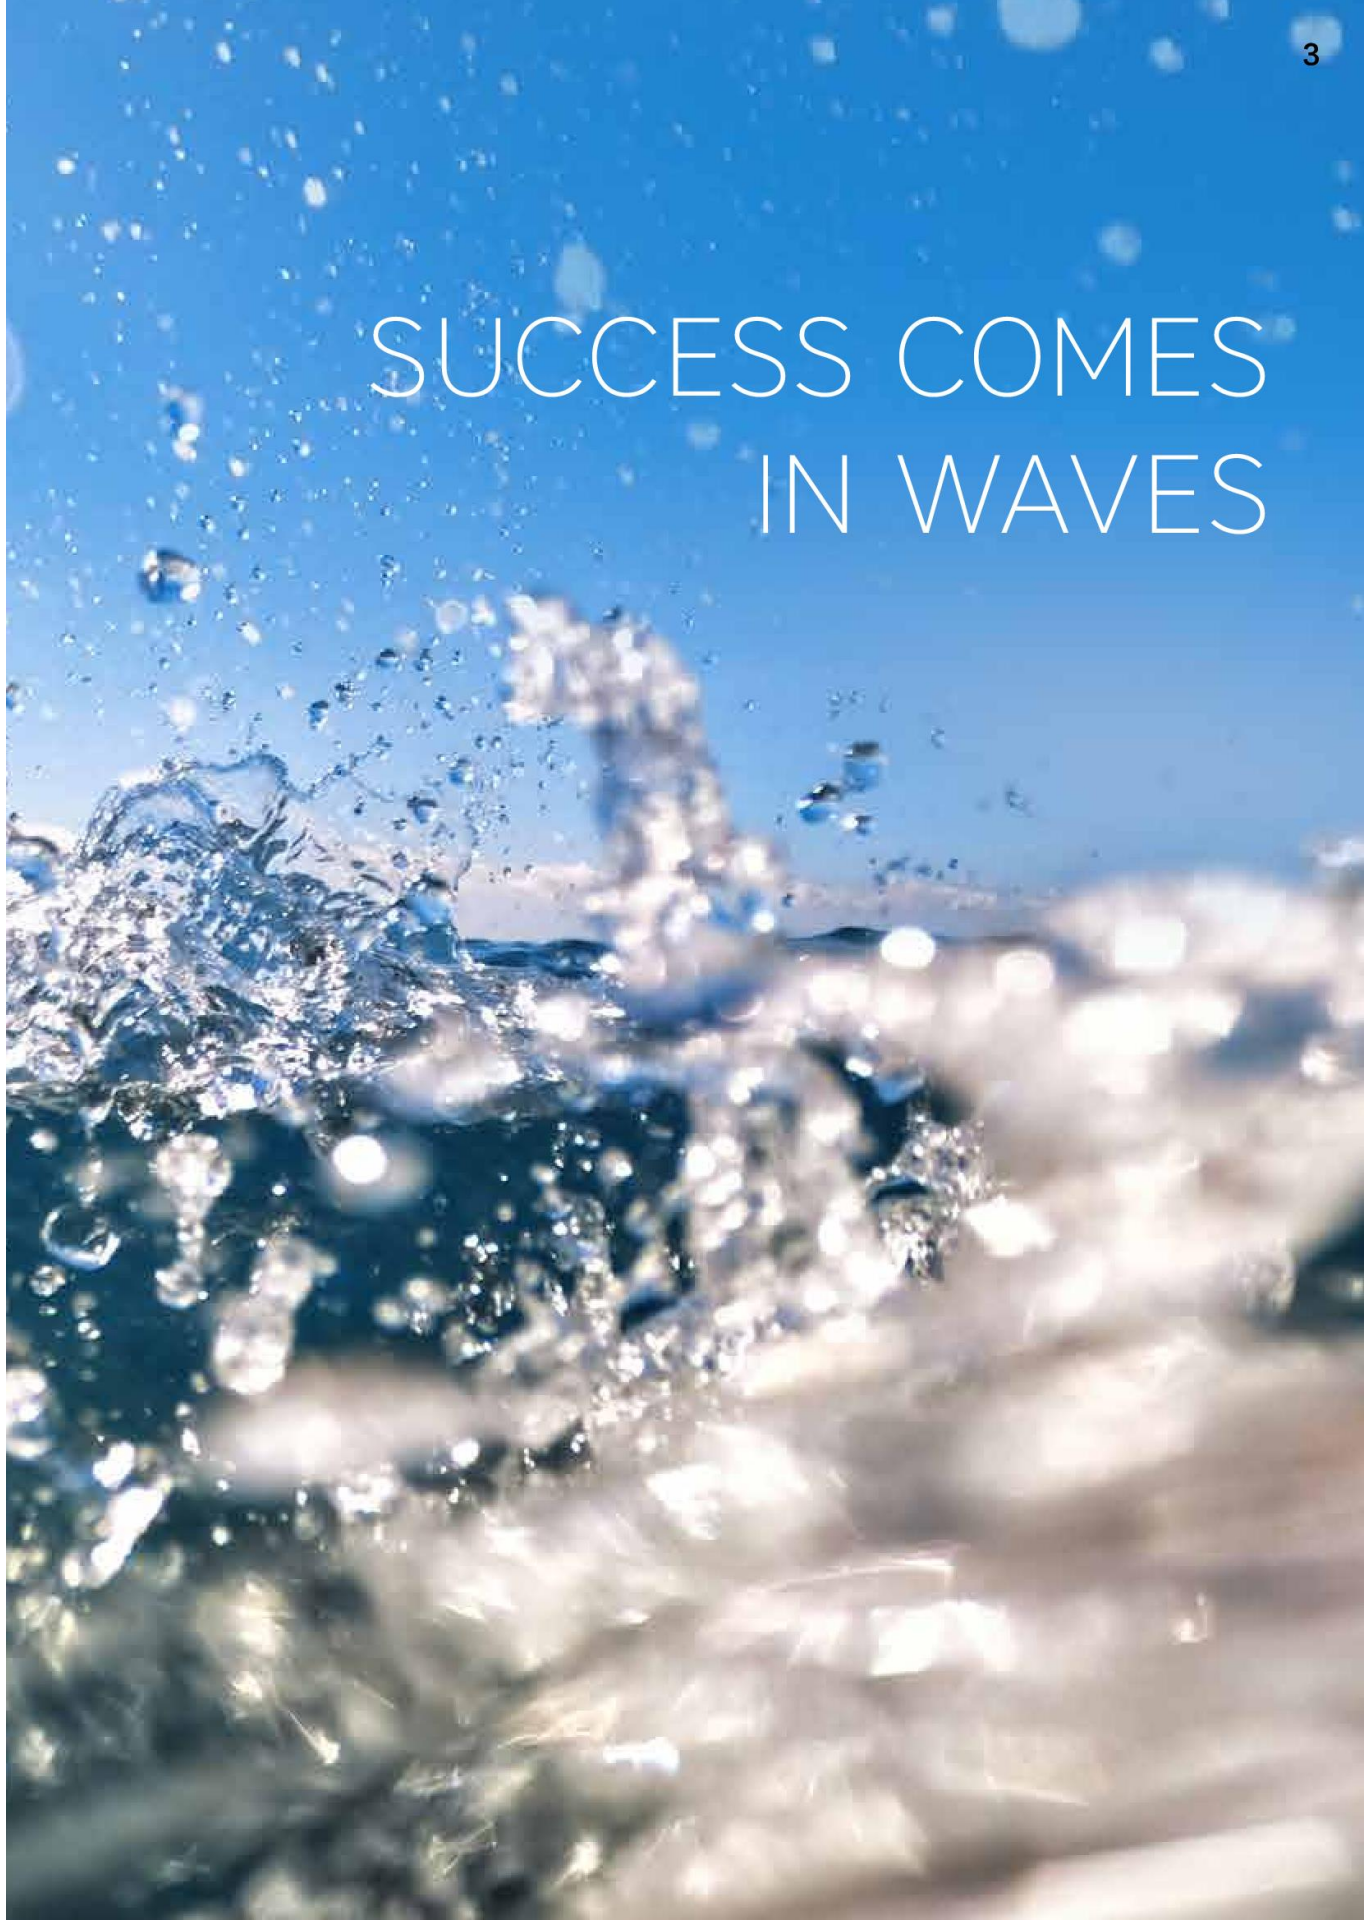

WATER
RESISTANT

A Huge Market Creates New Opportunities

Over the years, laminate flooring has become one of the best-selling flooring products due to its beautiful and durable features, coupled with the development of design and printing technology. Moreover, the laminate flooring with water resistance has become the most concerned point for people to buy laminate flooring.

SUCCESS COMES IN WAVES

Grow with us

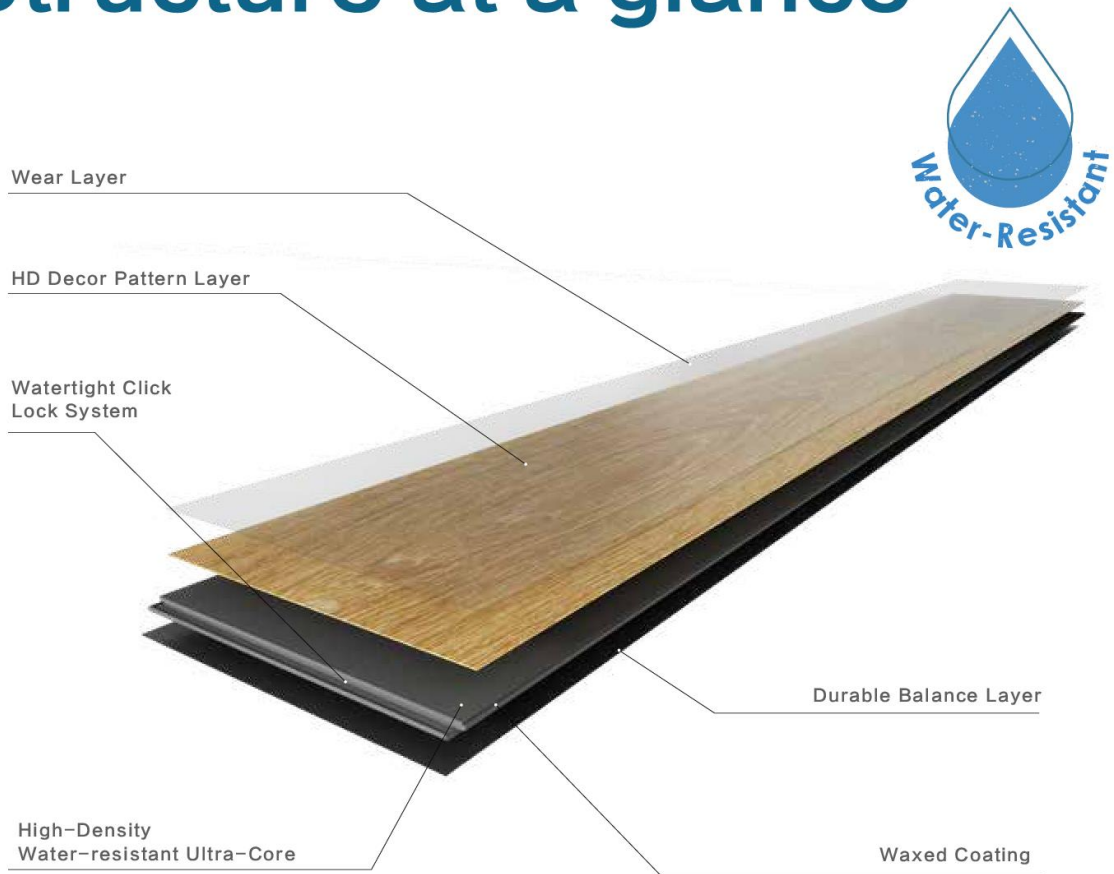

Water-resistant laminate flooring is the best of both worlds. For consumers, water resistance is very important for most families. For brands/distributors, this product can create more premiums.

Global Laminate Flooring Market is Expected to Account for USD 44.36 Billion by 2029. CAGR of 5.5% during the forecast period 2022-2029.

Structure at a glance

Thickness	8mm, 12mm
Dimension	1215 × 196, 1218 × 195, 1800 × 197...
AC Rating	AC3, AC4
Locking system	Unilin
Design	V-Groove
Density	900kg/m ³

THE SECRET OF WATER-RESISTANC

Water-Resistant Ultra Core

DECNO high-density ultra core, stable and durable, long-lasting water resistance.

Environmentally friendly wood-based fiber, not easy to be damp and moldy.

7 x 24h health guard.

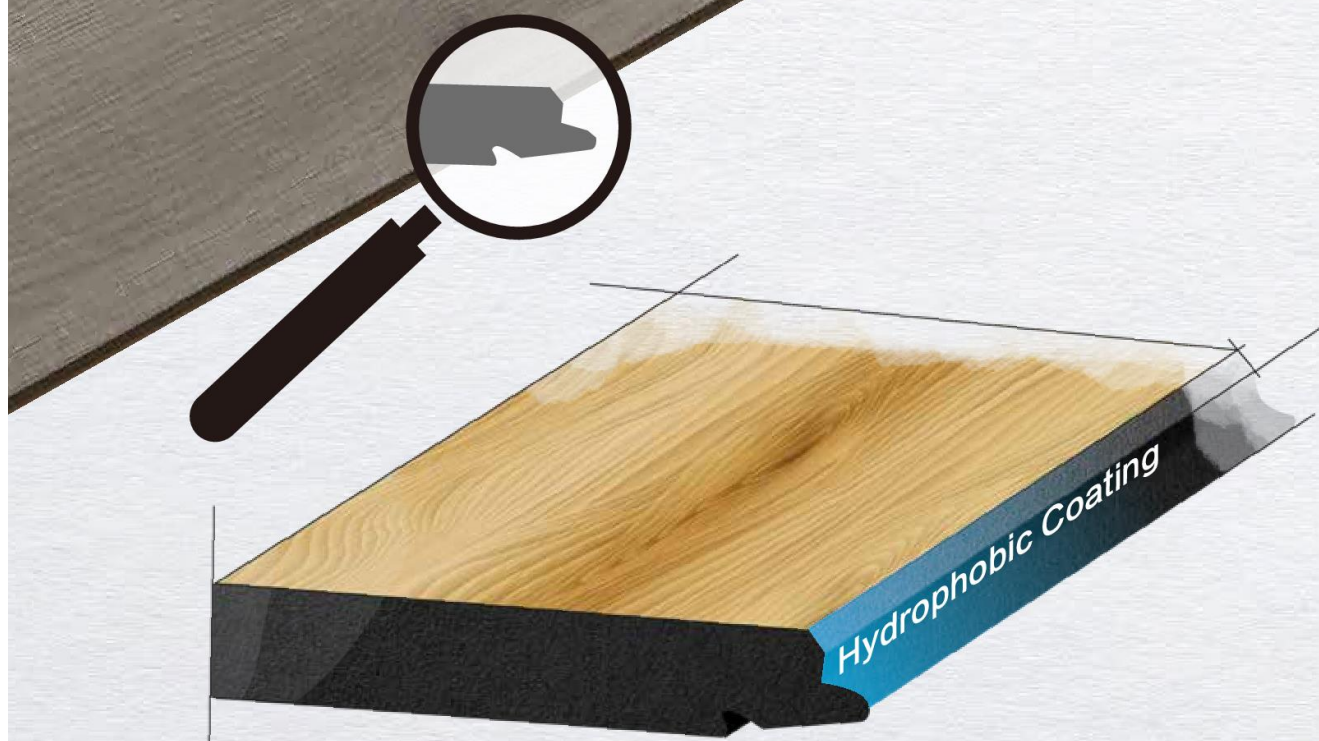

Watertight Joints

Just click and you can get close connection. No glue, easy to lock the floor.

Let the water aggregate into groups on the floor surface and prevent seepage.

Cutting-Edge Coating Powerful **Hydrophobicity**

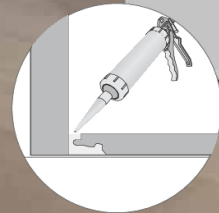

Hydrophobic coating technology is applied to the joints, which makes the tightly connected locking system have stronger water resistance and resists all moisture intrusion.

Extra Sealer

Say No to Water

A critical step in waterproof laminate flooring is to prevent moisture from leaking beneath the surface. After the floor is installed, use silicone sealant to seal the perimeter of the room, this will keep everyday household spills from penetrating the surface of the floor and keep moisture from intruding.

WATER-RESISTANT

ULTRA COREA
LAMINATE

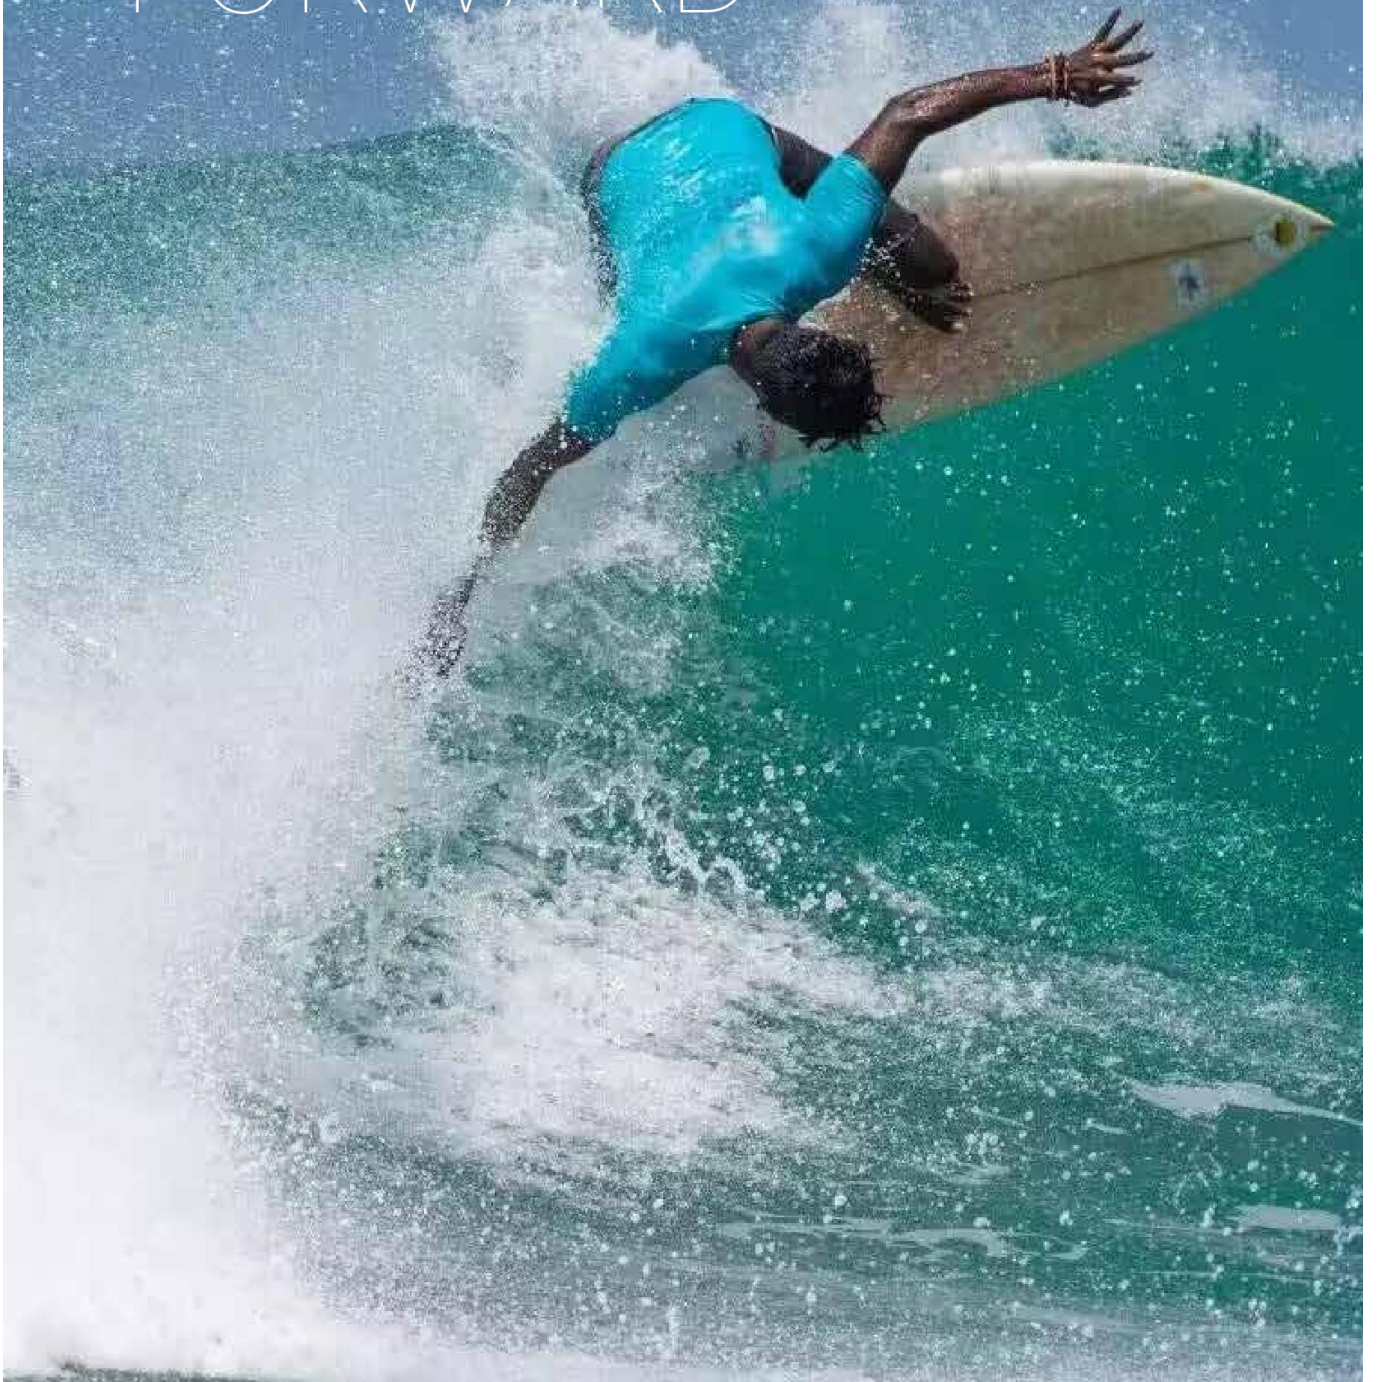

Is Water-Resistant Important For Laminate ?

As we all know, water is the biggest enemy of laminate flooring, which has become the reason why many people are still hesitating. The improved water resistance of laminate flooring will prevent spills, inhibit mold growth, and bring safer protection to families with children and pets. With the water-resistant performance and leading designs, it is an ideal flooring option for any room.

KEEP MOVING FORWARD

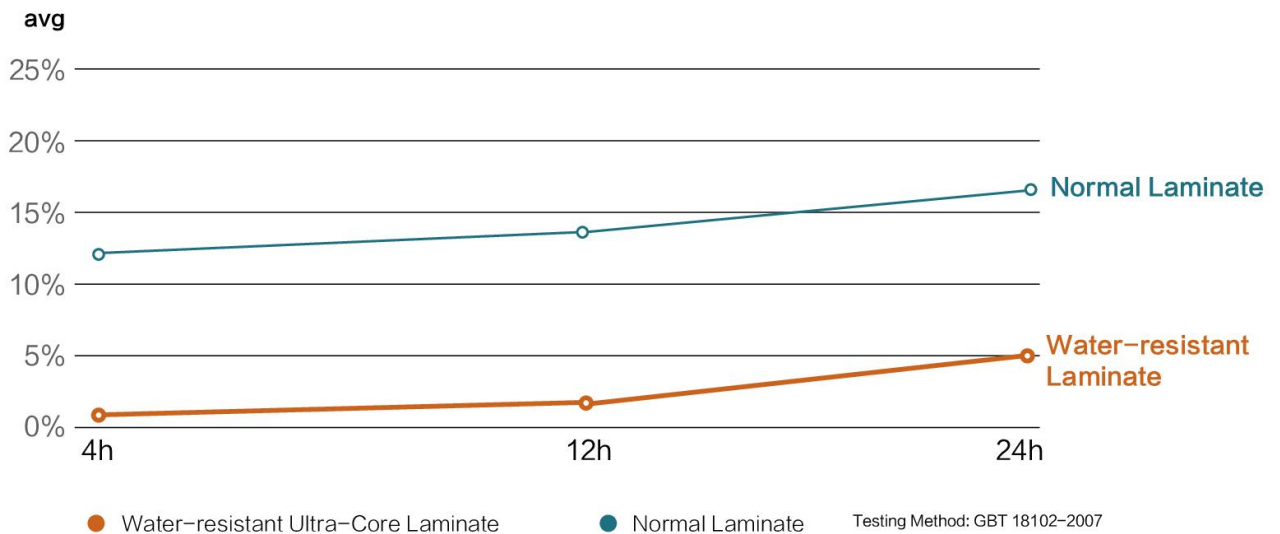

Water

No Worry!

As a new generation of laminate flooring, DECNO water-resistant laminate has a high-density Ultra Core. After soaking for 32 hours, the water swelling rate of DECNO Ultra Core Laminate is generally below 4%. This test data is far better than the EU standard.

Ultra-Core Laminate

Thickness swelling rate is only **< 5%** (24h)

Health , We Value !

The pursuit of healthy products originates from our respect for nature. Our Ultra Core laminate floors are sourced locally from high-quality wood sources and are free of contaminants from the start of production. Our products have passed many of the most accepted and recognized tests around the world and perform extremely well, so you don't have to worry about it.

Design We Lead!

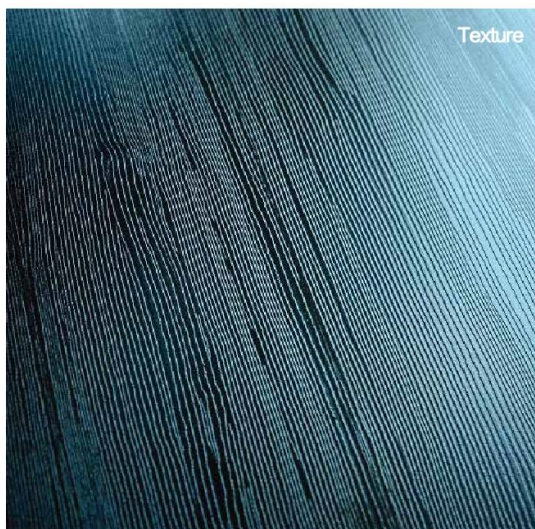

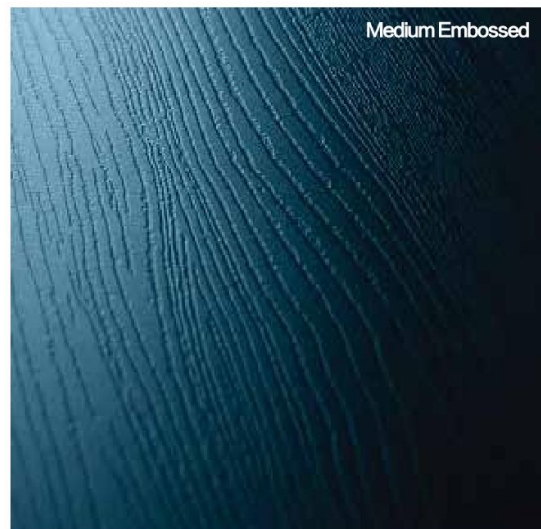

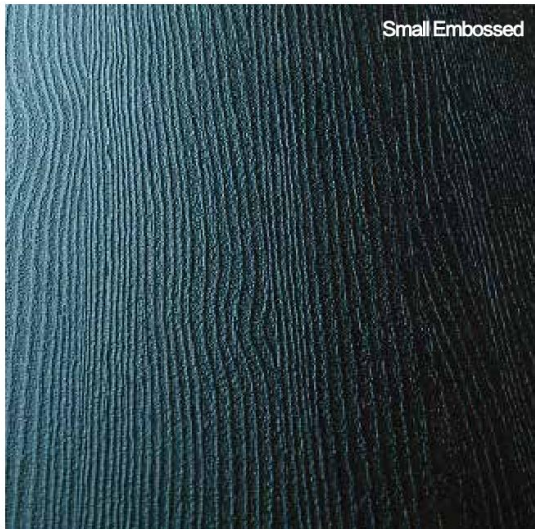

As one of DECNO's proudest floors, Ultra-Core Laminé is almost indistinguishable from real wood, and even more comfortable and high-performance. Based on floor manufacturing for 26 years, DECNO is good at discovering beauty from the details of nature and mapping it to our products.
